Daniel Plon

DMPLON@GMAIL.com (949) 294-6669 San Diego, CA linkedin.com/in/DPLON

SUMMARY

I am working to transition from human services. I have a background in GIS database logic, experience teaching software one-on-one, and I recently built an AI care-navigation product called Clairvana.com by orchestrating AI prompts and no-code workflows to solve massive institutional data bottlenecks. I prefer one-on-one workflow architecture roles over group training. Full resume viewable in LinkedIn.

EXPERIENCE

Founder & Principal Systems Architect

2026-Present

Clairvana · San Diego, CA

- Conceptualized, built, and launched an Ai-driven care navigation and workflow automation platform designed to dismantle systemic information silos in multiple states.
- Orchestrated the product roadmap and user experience (UX) layout, utilized generative Ai frameworks (Claude) and rapid prototyping tools to build automated, consumer-facing tools, including document decoders and interactive meeting simulators.
- Replaced fragmented, manually intensive state resource mapping with a unified, intuitive data workflow, reducing user navigation timelines and establishing a scalable blueprint for accessible digital infrastructure.

Service Coordinator

March 2025 to Present

San Diego Regional Center · San Diego, CA

- Conducted high-touch, one-on-one assessments with neurodivergent adults and families to map out personal care plans, navigate legal guidelines, and isolate systemic process friction.
- Engineered rigorous documentation, announced and unannounced visits, according to Title 17 regulations.
- Systematically reviewed and updated client collateral and procured the purchase of relevant services to better clients' lives. Managed and monitored 50 clients on caseload.
